EPJ C extends OA publishing scheme: free OA publishing of experimental papers

Dear Colleague,

In anticipation of successful negotiations with interested Open Access funding agencies, as of today and until such negotiations have taken place before or by the end of 2008, all experimental papers submitted to and accepted by *The European Physical Journal C - Particles and Fields* will be published with full, online open access without any fees being incurred by the authors. The paper categories concerned are letters and regular articles as well as scientific notes and tools articles on experimental physics.

This extends the scope of the present default scheme for publishing with online open access in any of the EPJ journals at the strongly discounted price of EUR 1,000.-- per article, with letter articles already being free of charge and open access by default for EPJ C since November 2006.

With best wishes,
Yours sincerely,

J Bartels (Editor-in-Chief)
S Bethke (Editor-in-Chief)
C Caron (Senior Publishing Editor)
