Trains circulation to France is interrupted

Dear Customer,
we would like to inform you that the **trains circulation to France is interrupted** between Andora and Cervo San Bartolomeo (Genoa/Ventimiglia line) due to a landslide on the railway line.

Impact and information

Due to the bad weather in Liguria, a landslide had occurred that caused the derailment of IC 660 train Milan-Ventimiglia.

The Italian railways network technicians are already on the spot to solve the inconvenience but at the moment it is difficult to foresee when the line could work again. Trenitalia has organized buses as substitution for passengers.

Delays and slowing down to the railway circulation are taking place also in other areas of Liguria.
