TRIESTE: SCIENCE FOR THE 2030 AGENDA

Wednesday 15 November 2023

Trieste, Salone degli Incanti | Conference Hall, 11:30

#InsiemepergliSDG (TogetherfortheSDGs) is the campaign promoted by the Italian Ministry of Foreign Affairs and International Cooperation, together with the partners FAO, UN SDG Action Campaign, CHIEAM Bari, and Save the Children to enhance the best local experiences that each city creates for the implementation of the UN Sustainable Development Goals. The initiative offers training and teaching activities, participatory politics, active citizenship and develops partnerships with local media to promote the messages of the campaign. Since October 2020, the initiative has touched - together with its installations, which raise awareness of young people and families on the role that each one can play for the SDGs - Bari, Teramo, Rome, Prato, Cremona, Milan, Siena, Brescia, and Bergamo. In 2023 the Campaign goes to Naples and Trieste, highlighting the role of Italian port cities as windows on the Mediterranean.

The stage of Trieste is dedicated to the important contribution that the city offers to the SDGs by hosting a global excellence, the international scientific hub. The hub brings together prestigious research and training bodies dedicated in particular to guaranteeing researchers from the Countries of the Global South the access to the best scientific knowledge and technologies that have a major impact on health, environment, and food security of the Countries of origin. Italy has always been a supporter of a multilateral model of scientific diplomacy and Trieste is a leading place in this tradition of dialogue and inclusion.

The event “Trieste: Science for the 2030 Agenda” intends to share with the citizens and the scientific community based in Trieste the commitment of the territory for the development. Through their initiatives in Trieste and worldwide – and with the support of the Government, the Region, and the local authorities – the organizations of the Trieste hub give concrete and daily support to the realization of the SDGs. From quality education to gender equality, from partnerships to the fight against climate change, from the fight against hunger to the search for clean and accessible energy. All this is realized thanks to science and innovation.
