

CALL FOR PROPOSALS

HANDS-ON SCIENTIFIC ACTIVITIES

Have you always had an idea for a cool science activity, game, or demo, but never had the chance to build it?

It's time to turn your science outreach idea into reality with the support of ICTP FabLab experts!

What we're looking for:

- Interactive, educational and engaging games, demonstrations, installations, experiments, small machines, etc.
- Experiences that build clear connections to scientific principles.
- Ideas that are scalable and suitable for public events, science fairs, or school visits.

**WHETHER YOU'RE A SENIOR
SCIENTIST OR A YOUNG STUDENT,
WE'D LOVE TO HEAR YOUR IDEAS!**

Development Support:

The projects will be developed in collaboration with Carlo Fonda and the ICTP FabLab – a makerspace fully equipped with tools such as 3D printers, laser cutters, and more.

Participants who are interested can get involved in the prototyping phase, working with cutting-edge tools and receiving support from experienced makers.

How to apply?

Please submit a brief proposal including:

- Title of the activity
- Target audience (age group)
- Short description (max. 500 words)
- Scientific concept(s) involved
- Materials or tools needed (if known)
- Any sketches or reference images

Send your proposal to: **pio@ictp.it**
before **December 12, 2025**
